SUMMARY

Third-year Computer Engineering student, full-stack developer across web and mobile platforms, and consistent Project Manager specializing in backend architecture and AI integration. Proven ability to lead cross-functional student teams (4-6 developers) from ideation to production while individually engineering complex features—from integrating real-time machine learning models to architecting secure webhooks. Adept at drafting technical specifications and delivering robust software solutions.

TECHNICAL PROJECTS

TaraCSE | Creator & Full-Stack Developer April 2026 - Present

- Built and launched an AI-powered Civil Service Exam prep platform (Next.js, Typscript, Supabase) that grew to hundreds of active users across the Philippines.
- Engineered a Gemini RAG pipeline (pgvector similarity search) that powers contextual AI answer explanations, with a cache that serves repeat requests at zero API cost.
- Built secure, cost-efficient API routes: per-user rate limiting, Supabase RLS, and round-robin Gemini key pooling. Runs entirely on free-tier infrastructure.

LYNK | Project Manager & Full-Stack Developer Feb 2026 - May 2026

- Directed the development of an exclusive, AI-integrated campus questing and social networking mobile app.
- Engineered and implemented backend webhooks to power real-time AI content moderation and drive algorithm-based social feed mechanics.

GesturiX | Project Manager & Full-Stack Developer Sept 2025 - Dec 2025

- Managed the end-to-end development of a mobile application designed to bridge communication gaps via American Sign Language (ASL) recognition.
- Integrated a trained PyTorch ASL machine learning model into the application's interactive Quiz feature, enabling real-time gesture validation to provide users with immediate, accurate feedback.

MediBridge | Project Manager & Backend Developer June 2025 - July 2025

- Led the development of a comprehensive telemedicine web platform connecting patients and healthcare professionals via secure, real-time video consultations.
- Designed and managed the database infrastructure to support appointment scheduling, real-time video consultations, and seamless communication with a separate AI-driven FastAPI microservice.

EDUCATION

Bachelor of Science in Computer Engineering Aug 2023 - Present

Cebu Institute of Technology - University

- Consistent College Dean's Lister.
- CpE Challenge: Java Competitive Programming (2026) 1st Place (Pre-Elimination) & 3rd Place (Finals).

ADDITIONAL INFORMATION

- Software Skills:** JavaScript, TypeScript, Python, Java, C#, Next.js, Node.js, React Native, Supabase, PostgreSQL.
- Hardware & Systems:** C, Arduino, Cisco Networking, Bash Scripting.
- AI & ML:** PyTorch, TensorFlow, Scikit-learn, Vector Embeddings, RAG Architectures.
- Leadership & Extracurriculars:**
 - Game Referee & Facilitator:** National ROBOQUEST (2024-2026) and Pilipinas RoboSports Tournament (2026).
 - Active Tech Community Participant:** DevFest Cebu (2025), UXPH Cebu (2025).
